Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 5, 6, 10, 12 and 13, drawn to a method of inducing differentiation of mammalian embryonic stem cells into functioning pancreatic cells, pancreatic cells, and methods of using the cells to treat disorders of pancreatic function classified in at least class 435, subclass 377.
- II. Claims 7, 8, 11 and 14 drawn to a method of inducing differentiation of mammalian embryonic stem cells into functioning nerve-like cells, pancreatic cells, and methods of using the cells to treat disorders in nerve function classified in at least class 435, subclass 377.

Claims 1-4 and 9 link(s) inventions I and II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 1-4 and 9. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Inventions I and II are mutually exclusive and independent inventions. As evidenced by the claimed subject matter, the methods of differentiating pancreatic islet-like cells and nerve-like cells require materially different and separate media. Further, neither the

methods nor cells of invention I is needed to implement the methods or cells of invention II, or vice-versa.

Because these inventions are distinct for the reasons given above and have acquired because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. Any search would not be co-extensive.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

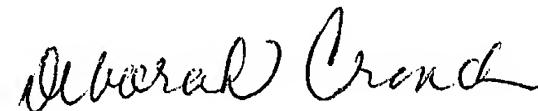

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
